The 1Future Project is excited to announce its upcoming International Symposium, a gathering of researchers, educators, students, and businesses, committed to imagining and shaping more collaborative environments for a more sustainable future. Date: 16-17 October 2025 Location: Podgorica, Montenegro Organised by: UoM, FEUT, and UNS

CALL FOR PAPERS FOR THE INTERNATIONAL SYMPOSIUM - "BRIDGING RESEARCH BETWEEN BUSINESS AND ACADEMIA FOR A GREENER TOMORROW"

**Co-funded by
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them

INSIDE THIS ISSUE

- Publication of the Special Issue: Climate and Sustainability
- Launching of the 1FUTURE PLATFORM, a collaborative virtual space in the WB region
- Sustainable Future Dialogues: A podcast series launched by 1FUTURE

LAUNCHING OPEN LECTURES ACROSS PARTNER UNIVERSITIES: 1FUTURE IN ACTION THROUGH TEACHING MOBILITIES

STRENGTHENING KNOWLEDGE EXCHANGE THROUGH 1FUTURE COLLABORATION

»»» INTERNATIONAL EXPERTISE : PROFESSORS FROM HNEE, LUND, IUAV, AND UKIM LEAD OPEN LECTURES

Over the past months, professors from Lund University, HNEE, IUAV, and UKIM have conducted a series of open lectures at the partner universities within the 1FUTURE project. These sessions brought valuable international expertise to students and academic staff, focusing on key topics such as sustainability, global warming, climate change, and disaster risk management. Through interactive presentations and knowledge exchange, the lectures have contributed significantly to raising awareness and strengthening capacities for addressing environmental challenges, while fostering a shared commitment to building more resilient and sustainable communities.

SPOTLIGHTS ON OPEN LECTURES

Upcoming: University of Novi Sad professors will deliver their open lectures this May at UT, ULA, and UPT under the 1FUTURE project.

BUILDING CLIMATE-RESILIENT KNOWLEDGE THROUGH OPEN LECTURES AND TEACHING MOBILITIES

PROMOTING SUSTAINABILITY, CLIMATE ACTION, AND RISK MANAGEMENT ACROSS PARTNER INSTITUTIONS

Through open lectures delivered by professors from HNEE, Lund, IUAV, UNS and UKIM, and targeted training initiatives across partner universities, the 1FUTURE project is building climate-resilient knowledge among students and academic staff. By promoting sustainability, climate action, and risk management practices, these activities strengthen institutional capacities and foster a collaborative environment for addressing global environmental challenges.

BUILDING KNOWLEDGE FOR A RESILIENT TOMORROW

Through open lectures and training initiatives led by international professors, the 1FUTURE project is equipping students and academic staff with essential knowledge and skills to address climate change, promote sustainability, and manage environmental risks — laying the foundations for a more resilient and sustainable future.

SPOTLIGHTS ON OPEN LECTURES

STRENGTHENING CAPACITIES THROUGH INTERNATIONAL TRAINING PROGRAMS ACROSS 1FUTURE PARTNER INSTITUTIONS

»»» CROSS-BORDER KNOWLEDGE EXCHANGE: LEARNING FROM LEADING EUROPEAN UNIVERSITIES

Empowering university staff to foster innovation and sustainability while advancing institutional readiness to address environmental and climate challenges.

»»» STRENGTHENING ACADEMIC LEADERSHIP FOR CLIMATE AND SUSTAINABILITY GOALS

Within the 1FUTURE project framework, professors from Western Balkan universities are participating in intensive training programs at LUND, HNEE, UNS, UKIM and IUAV. These activities are designed to build advanced competencies in sustainability, innovation, climate action, and risk management, all of which are critical to the future of higher education in the region.

By engaging with leading European institutions, participants refine their teaching methodologies, expand their research perspectives, and strengthen institutional strategies for resilience and international collaboration.

These training initiatives not only contribute to the professional development of individuals but also lay the foundation for universities to become proactive agents of change, driving sustainable development and climate resilience across the Western Balkans and beyond.

CONTINUING THE JOURNEY: LUND AND IUAV TO HOST WESTERN BALKAN UNIVERSITY STAFF FOR MAY TRAININGS

ANNOUNCING THE INTERNATIONAL SYMPOSIUM “BRIDGING RESEARCH BETWEEN BUSINESS AND ACADEMIA FOR A GREENER TOMORROW”

This Symposium endeavours to encourage multidisciplinary dialogue, promote knowledge exchange, and inspire actionable solutions to sustainability challenges faced across the Western Balkans and the EU. It will serve as a hub for exploring innovative ideas and building partnerships that drive meaningful impact in the face of global climate and environmental transformations.

Key Themes for Contribution and Discussion:

- Sustainable economic and business models
- Environmental justice and equity in public policies
- The role of technology and innovation in sustainability Engineering, Energy and Resource Management
- Sustainable urban and rural development
- Education and Communication

Climate change and sustainability have become urgent global priorities, demanding collective action across sectors. Human activities—from emissions to deforestation—have triggered environmental disruptions that threaten ecosystems, deepen social inequalities, and hinder progress toward the Sustainable Development Goals (SDGs).

In response, the University of Montenegro, the Faculty of Economics at the University of Tirana, and the University of Novi Sad, within the 1Future project, are organizing the International Symposium “Bridging Research Between Business and Academia for a Greener Tomorrow.”

Important Dates:

Submission Start: April 2025

Deadline: 20 June 2025

Notification of Acceptance: 31 July 2025

Publication Date: 15 September 2025

This event serves as a distinguished forum for advancing scholarly discourse on sustainability and climate change. By fostering interdisciplinary collaboration among researchers, practitioners, and policymakers, it aims to bridge theoretical frameworks with actionable solutions. We invite you to contribute to this critical dialogue and play an active role in shaping comprehensive and forward-looking responses to the global environmental crisis.

1FUTURE PROJECT LAUNCHES "SUSTAINABLE FUTURE DIALOGUES"

As part of its ongoing mission to foster collaboration between academia and industry for a more sustainable future, the 1FUTURE Project proudly announces the launch of the Sustainable Future Dialogues podcast series.

The series, hosted by the Faculty of Economics at the University of Tirana, debuted in November 2024 and has since released four episodes. They feature expert insights from visiting staff of EU partner institutions, exploring key topics related to sustainability, innovation, and the critical role of academic-business cooperation in addressing climate challenges.

LAUNCHING OF THE 1FUTURE PLATFORM

In March 2025, a series of regional workshops in Bosnia and Herzegovina, Albania, and Montenegro were organized aiming at officially launching the 1FUTURE platform—a new virtual space designed to connect academia and business in advancing sustainability and climate action.

Organized by partner universities and chambers of commerce in each WB country, the events gathered diverse participants from business, government, academia, and civil society. Attendees explored the platform's features, and discussed opportunities for collaboration through joint research, internships, and training.

The workshops highlighted the platform's potential to drive innovation, bridge knowledge gaps, and foster impactful partnerships across the region. Participants committed to continued engagement and using the platform as a tool for real-world sustainable solutions.

➤➤➤ PUBLICATION OF THE SPECIAL ISSUE: CLIMATE AND SUSTAINABILITY

In March 2025, the project teams proudly announced the publication of the Special Issue: Climate and Sustainability. The issue collected contributions from 20 papers authored by project partners representatives and other collaborators.

In recent decades, the discourse on sustainability and climate change has evolved from academic reflection to an urgent global priority. The interconnected nature of environmental, social, and economic systems highlights the pressing need for coordinated efforts to address climate-related challenges.

Climate change, driven largely by human activities such as greenhouse gas emissions, deforestation, and industrialization, has already resulted in severe environmental disruptions.

Recognizing the need for innovative solutions and interdisciplinary collaboration, the Albanian Journal of Economy and Business has dedicated this special issue “1Future Issue: Climate and Sustainability” to exploring diverse research paths on sustainability and climate change. The contributions to this issue aim to bridge the gap between research and practical implementation, fostering dialogue among scholars, policymakers, and practitioners. A critical objective of this initiative is to enhance research output and scholarly engagement in the Western Balkans, where climate change and sustainability research remain underrepresented.

This special issue is an outcome of the “jOINed For sUsTainability - bUilding climate REsilient communities in WB and EU - 1FUTURE project”, a project funded by the European Union in the framework of the Erasmus+ Program.

Through an open-access model, the journal seeks to disseminate knowledge widely, making research accessible to a broader audience. The inclusion of interdisciplinary perspectives ensures that contributions span natural sciences, social sciences, engineering, business, health, and humanities, reflecting the multifaceted nature of sustainability challenges.
